

INTERNET USAGE AGREEMENT

Internet & Social Media:

LEMCA urges parents to monitor their students' internet access at home. Though the school cannot block every inappropriate website, we monitor students' access to the internet and apply filters to make accessing inappropriate sites more difficult. Social media sites are not to be accessed from school computers. Accessing inappropriate websites, sending or forwarding inappropriate material, cyberbullying or harassment constitutes a violation of the school's internet policy and may result in the student losing internet privileges in addition to disciplinary action. The school does not allow anyone to publish texts, images, or other information about LEMCA or its students, faculty, or staff without permission from the school administration whether the origin of the publication is a school computer or a personal device.

Consequences for inappropriate use of electronic devices:

As stated above, violation of the appropriate use of electronic devices, computers, etc. will result in verbal reprimand by the classroom teacher. Two reprimands will result in an out-of-school suspension.
